Art Unit: 1644

DETAILED ACTION

The Examiner in charge of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to F. Pierre VanderVegt, Ph.D. in Art Unit 1644.

Claims 1-45 and 59-83 have been canceled.

New claims 84-93 have been added.

Claims 46-58 and 84-93 are currently pending and are the subject of examination in the present Office Action.

1. In view of applicant's amendment filed June 17, 2005, no outstanding grounds of rejection are maintained.

Claim Rejections - 35 USC § 112

2. Claims 47-50, 55-58 and 84-93 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a written description rejection.

The instant claims are drawn to a complex or pharmaceutical composition thereof, wherein said complex comprises a glutamic acid decarboxylase peptide "which is bound to an allele or a peptide-binding derivative of MHC Class II molecules DR3 or DR4 selected from the group consisting of DR B1 0301, DR B1 0401, DR B1 0402 and DR B1 0404."

The term "derivative" invites changes to the base sequence of the MHC class II molecule of the complex including unspecified substitutions, additions and/or deletions of amino acid residues. The instant specification discloses at page 12 that a "peptide-binding of a MHC molecule" comprises fragments of MHC molecules by various methods and have "essentially" retained their peptide-binding properties. Accordingly, one of skill in the art would not have recognized Applicant to be in possession of the full scope of what is recognized as a "derivative" of an MHC class II molecule, but only of peptide-binding fragments of the MHC class II DR3 and DR4 alleles.

Vas-Cath Inc. v. Mahurkar, 19 USPQ2d 1111, makes clear that "applicant must convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention. The invention is, for purposes of the 'written description' inquiry, *whatever is now claimed*." (See page 1117.)"

Art Unit: 1644

It is suggested that Applicant amend each of claims 84-89 to recite --which is bound to an MHC class II DR3 or DR4 allele selected from the group consisting of DR B1 0301, DR B1 0401, DR B1 0402, DR B1 0404, and peptide-binding fragments thereof.--

It should be noted that claims 49, 90 and 91 similarly recite "derivative" and should be amended accordingly.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 57 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 57 is ambiguous and unclear in the recitation of "accessory stimulating component" because nothing in the claim or in any base claim indicates what function or component of a host receiving the pharmaceutical composition is supposed to be stimulated.

Conclusion

4. No claim is allowed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to F. Pierre VanderVegt whose telephone number is (571) 272-0852. The examiner can normally be reached on M-Th 6:30-4:00 and Alternate Fridays 6:30-3:00.
